

METALLURGIA—Index to Volume XXXV

NOVEMBER 1946—APRIL 1947

A	Page	C	Page	Page	
Absorptiometric Analysis of High and Super High-speed Steels. A Compound Method for the. By F. E. Eborall, A.Met., A.I.M.	104-106	Canada, Electrochemists Congress in	22	Developments, Recent, in Steel Making. By J. A. Kilby and W. G. Cameron	215-220
Alloy and Carbon Steels for General Service Applications. 130-132		Carbon and Alloy Steels for General Service Applications. Cartridge Brass (70-30), Cold-Working and Recrystallization of. By Charles A. Nagler and Ralph L. Dowdell	130-132	Draw Dies, Tungsten Carbide. By Richard Saxton	68-69
Alloy Cast Irons, The Year's Progress in the Production and Application of. By A. E. McRae Smith, M.A., B.Sc.	93-96	Casting (Precision), A Survey of. By J. N. Read	285-289	Drier Rolls (Steel), Jacketed Type. By William H. Funk	249-252
Alloys and Metals used in Construction, Ductility of, III. By Dr. Georges Welter	33-36	Castings (Magnesium Sand) Production of. By G. B. Partridge	275-278	Ductility of Metals and Alloys Used in Construction. By Dr. Georges Welter	33-36
Alloy Steels, Colorimetric Estimation of Molybdenum in. By G. V. L. N. Murty, M.Sc., A.R.I.C., D.Sc.	167-168	Cemented Tungsten Carbide, Production of. By Stuart H. Brierley	279-284	E	
Alloy Steels, Some aspects in the Development of. By L. Rotherham, M.Sc., F.Inst.P.	75-77	Centrifugal Casting of Brass (63:37) Ingots for Subsequent Cold Rolling. By T. B. Crow, Ph.D., F.R.I.C., F.I.M.	253-254	Early Mining and Metallurgy. Royal Anthropological Institute	168
Aluminium 1946. By W. C. Devereux, F.R.Ae.S.	191-192	Ceylon, The Geology and Mineral Resources of. By L. J. D. Fernando, M.Sc., A.R.C.S., D.I.C.	141-146	Economic Planning	273
Aluminium Alloys, Developments in the Application of. By E. D. Illiff, B.Sc. (Eng.)	197-201	Chill-Cast and Sand-Cast Ingots of 10% Tin Bronze, The Relations between Segregation Structure and Porosity in. By W. T. Pell-Walpole, B.Sc., Ph.D., A.I.M., and V. Kondic, B.Sc., Ph.D.	152	Electric Drives to Recovery	264
Aluminium Alloys, the Colorimetric Estimation of Antimony in, using Potassium Iodide and Thiourea. By J. H. Bartram and P. J. C. Kent	91-92	Coil Rest and V. P. N. Scales	181-187	Electrochemists' Congress in Canada	22
Aluminium and its Alloys, forming of, by the Drop Stamp	64	Cold Reduction Reversing Strip Mill, the New 80-in. John Summers & Sons, Ltd.	166	Electron Jubilee Celebrations, next year	74
Aluminium and its Alloys, Surface Hardening of. By K. G. Robinson, B.Sc., and B. W. Mott, M.A.	201-204	Colloidal Graphite in the Metal Industry	1-2	Electroplated Finishes under Humidity (K.110) Test, Comparison of. By Frank Taylor	63-64
Aluminium Alloys, The Use of the Low-Frequency Electric Induction Furnace for the Melting of. By D. Boxall	205-206	Colorimetric Estimation of Antimony in Aluminium Alloys using Potassium Iodide and Thiourea. By J. H. Bartram and P. J. C. Kent	37-40	Electroplating in the Recent World War, Military Applications of. By William Blum	246-248
Aluminium Bronzes at Elevated Temperatures, The Mechanical Properties, including Creep of. By E. Voce, Ph.D., M.Sc., F.I.M.	3-9	Colorimetric Methods of Metallurgical Analysis, Investigations on. By G. V. L. N. Murty, M.Sc., A.R.I.C., D.Sc.	301-302	Emission Spectroscopy as Applied to Industry, The History and Present Status of. By John Convey, F.Inst.P.	9-12, 107-110
Aluminium Developments, Some Aspects of Progress. By S. A. J. Sage	193-196	Comparison of Electroplated Finishes under Humidity (K.110) Test. By Frank Taylor	63-64	Engineering, Social Aspects of. By P. H. Kutar	274
Aluminium Sheet, Plans for Increased Output of	59-61	Construction, Ductility of Metals and Alloys used in. Part III. By Dr. Georges Welter	33-36	Equipment for the Royal Train	106
Archaeic Mining Apparatus, Some. By Douglas Rennie Hudson, B.Sc., Ph.D.	157-164	Continuous-Type Rolling Mill (New)	59-61	F	
Automatic Control of Soaking Pits. By C. H. Stone	18-22	Control (Automatic) of Soaking Pits. By C. H. Stone	18-22	Failure of Metals by Fatigue. Symposium, Faculty of Engineering, University of Melbourne	289-293
B		Copper Alloy Resistance Materials. By Dr. H. G. Taylor	248	Metallography, Fatigue of Metals and Conventional Stress Analysis. By Professor H. G. Moore	290
Blast-Furnace Gas, Analysis of. Modern Methods of Gas Analysis. By W. D. Vint	294-296	Copper and Copper Alloys. A Survey of Technical Progress during 1946. By E. Voce, Ph.D., M.Sc., F.I.M.	78-84	Theories of the Mechanism of Fatigue Failures. By W. Boas	290-291
Brass (63:37) Ingots, The Centrifugal Casting of, for Subsequent Cold Rolling. By T. B. Crow, Ph.D., F.R.I.C., F.I.M.	141-146	Cranes, Manganese Wheels for Czechoslovakia and Poland, British Interests affected by Nationalisation in	62	Fatigue Problems Associated with Aircraft Materials. By Dr. H. Sutton	291-292
Britain, Gold in. By J. E. Metcalfe, Assoc. Inst. M.M., Assoc. M.I.M.E.	65-66	D		Repeated Loading of Structures. By Prof. A. G. Pugsley	292
Britain's First Post-War Year.	57-58	Development of Alloy Steels, Some Aspects in the. By L. Rotherham, M.Sc., F.Inst.P.	75-77	Structures Liable to Fatigue Failure and Some Considerations in Their Designs. By L. R. Jackson and H. J. Grover	292-293
British Cast Iron Research Association. Dr. Harold Hartley's Presidential Address	71-73	Developments, Aluminium. Some Aspects of Progress. By S. A. J. Sage	193-196	The Factors Contributing to Fatigue Failure in Aircraft. By C. W. George, S. F. Grover and B. Chalmers	293
British Cast Iron Research Association. Presentation to Mr. J. G. Pearce	73	Developments in the Application of Aluminium Alloys. By E. D. Illiff, B.Sc. (Eng.)	197-201	Ferrous Analysis. Five Years' Advancement. By E. C. Pigott	133-137, 207-210
British Cast Iron Research Association Silver Jubilee Celebration	71-73			Fuel Production and Utilisation Furnace, A Rotary Hearth. By General Electric Co., Ltd.	96
British Interests affected by Nationalisation in Czechoslovakia and Poland	103			Furnaces (Open-Hearth Steel making), Instrumentation of	278
British Steel Supplies for 1947	123-124			Furnace Usage and Design, Essential Considerations in. By Herbert Southern, F.Inst. F., A.M.I.Mech.E., M.Am. Soc.M.E.	227-232

	Page		Page		Page
Gas Turbines, The Development of a High Creep Strength Austenitic Steel for. By D. A. Oliver, M.Sc., and G. T. Harris, M.A.	235-238	Iron and Steel Institute Annual Autumn Meeting	23-28	Metallurgical Laboratory (National) for India	61-62
Gold in Britain. By J. E. Metcalfe, Assoc. Inst.M.M., Assoc. M.I.M.E.	65-66	The Influence of Port Design on Open Hearth Furnace Flames. By J. H. Chesters, D.Sc., and M. W. Thring, M.A., F.Inst.P.	23	Metallurgy?, Whither. By J. W. Jenkin, Ph.D., B.Sc., A.R.I.C., F.I.M.	41-46
Grain Refinement and Melting Technique — Production of Magnesium Sand Castings. By G. B. Partridge, A.I.M.	241-245	A Heat-Flow Meter for use in Furnaces. By R. H. Baulk, M.Sc., and M. W. Thring, M.A., F.Inst.P.	23-24	Metals and Alloys used in Construction. Ductility of. By Dr. Georges Welter	33-36
Graphite (Colloidal) in the Metal Industry	301-302	The Origin and Constitution of Certain Non-Metallic Inclusions in Steel. By J. R. Rait, B.Sc., Ph.D., and H. W. Pinder, Assoc. Met., F.I.M.	24-25	Military Applications of Electroplating in the Recent World War. By William Blum	246-248
H		The Neutralisation of Sulphur in Cast-iron by Various Alloying Elements. By H. Morregh	25	Mining Apparatus, Some Archaic. By Douglas Rennie Hudson, B.Sc., Ph.D.	157-164
High and Super High-Speed Steels, A Compound Method for the Absorptiometric Analysis of. By F. E. Eborall, A. Met., A.I.M.	104-106	The Removal of Hydrogen from Steel. By Prof. J. H. Andrew, D.Sc., H. Lee, B.Eng., Ph.D., A. K. Mallik, B.Met., B.Sc., Ph.D., and A. G. Quarrell, D.Sc., F.Inst.P., F.I.M.	25-26	Molybdenum in Alloy Steels, Colorimetric Estimation of. By G. V. L. N. Murty, M.Sc., A.R.I.C., D.Sc.	167-168
High Creep Strength Austenitic Steel for Gas Turbines, the Development of a. By D. A. Oliver, M.Sc., and G. T. Harris, M.A.	235-238	New Annealing Plant for Steel Strip in Coils at the Whitehead Iron and Steel Co., Ltd., Newport, Mon. By B. Jones, D.Sc., and I. Jenkins, M.Sc.	26	N	
High-Temperature Coking	1-2	The Formulation of Anti-Corrosive Compositions for Ship's Bottoms and Underwater Service on Steel. Part II. By F. Faneutt, F.R.I.C., and J. C. Hudson, D.Sc.	26-27	National Metallurgical Laboratory for India	61-62
Hydrogen, New Uses and Methods of Production	165-166	Report on Anti-Fouling Research 1942-44. Marine Corrosion Sub-Committee	27	New Magnetic Alloy	300
I		Interim Descriptive Statement on the Leaching-Rate Test for Ships' Anti-Fouling Compositions. The Joint Technical Panel on the Leaching Rate Test of the Marine Corrosion Sub-Committee.	27-28	Notching under Axial and Eccentric Loads, The Effects of. By Dr. Georges Welter	33-36
India, National Metallurgical Laboratory for	61-62	Iron and Steel, The Chemical and Physico-Chemical Analysis of, Five Years' Advancement. By E. C. Pigott	207-210	O	
Industrial Project for Eaglescliffe	74	Ironfounding Industry, Recruitment in	2	Open - Hearth Steel - making Furnaces, Instrumentation of Orsat Gas Analysis Apparatus. Modern Methods of Gas Analysis. By W. D. Vint	255-257
Infra-Red Gas Burner. By L. Sanderson	187-189, 239-240	J		P	
Institute of Metals, Annual General Meeting	259-263	Jacketed Type Steel Drier Rolls. By William H. Funk	249-252	Phosphatising of Zinc Surfaces. By E. E. Halls	69-70
Hot-Shortness of Aluminium-Silicon Alloys of Commercial Purity. By A. R. E. Singer, B.Sc., and P. H. Jennings, B.Sc.	260	K		Planning Economic	273
Hot-Shortness of Some Aluminium-Iron-Silicon Alloys of High Purity. By A. R. E. Singer, B.Sc., and P. H. Jennings, B.Sc.	260	K.110 Humidity Test, Comparison of Electroplated Finishes under. By Frank Taylor	63-64	Platinum Metals in 1946	168
Properties of the Aluminium-Silicon Alloys at a Temperature in the Region of the Solidus. By A. R. E. Singer, B.Sc., and S. A. Cottrell, B.Sc.	260-261	L		Poland and Czechoslovakia, British Interests affected by Nationalisation in	103
The Influence of Composition on the Adhesion of Tin-Base Bearing Alloys to Steel. By P. G. Forrester, M.Sc., and L. T. Greenfield, M.Sc.	261	Low-Frequency Electric Induction Furnace, the Use of the, for the Melting of Aluminium Alloys. By D. Boxall	205-206	Porosity and Segregation Structure, the Relations between, in Chill-Cast and in Sand-Cast Ingots of 10% Tin Bronze. By W. T. Pell-Walpole, B.Sc., Ph.D., A.I.M. and V. Kondic, B.Sc., Ph.D.	181-187
Effect of Iron and Silicon Impurities on the Tensile Properties and Heat-Treatment Characteristics of Sand-Cast Aluminium. By R. T. Parker, Ph.D., B.Sc., A.R.S.M., G.M.L., Cox, B.A., and A. N. Turner, B.Sc., A.R.S.M.	261	M		Post-War Year, Britain's First Precision Casting, A Survey of. By J. N. Read	275-278
The Selective Corrosion of Phosphor-Bronze in Hot Water. By W. D. Clark, M.A., M.Sc.	261-262	Magnesium and its Alloys. A Survey of Recent Technical Progress. By F. A. Fox, M.Sc., F.I.M.	85-91	Progress, Aluminium Developments. By S. A. J. Sage	193-196
Magnesium - Cerium - Zirconium Alloys. Properties at Elevated Temperatures. By A. J. Murphy, M.Sc., and R. J. M. Payne, B.Sc.	262	Magnesium Casting Alloys — Their Production and Use. By G. B. Partridge	13-17	Progress in Copper and Copper Alloys during 1946. By E. Voce, Ph.D., M.Sc., F.I.M.	78-84
Some Factors in the Reduction of the Iron Content of Magnesium-Base Alloys. By F. A. Fox, M.Sc., C. J. Bushrod, M.Sc., and S. E. Mayer, Ph.D.	262-263	Magnesium Sand Castings. By G. B. Partridge	147-152, 241-245, 279-284	Progress in "Magnesium and its Alloys" By F. A. Fox, M.Sc., F.I.M.	85-91
Instrumentation of Open-Hearth Steel-making Furnaces.	278	Magnesium - Zirconium Alloys	124	Progress in the Tin Consuming Industries. By John Ireland, M.C., B.Sc.	97-100
Inventors, Royal Commission on Awards to. By S. T. Madeley	31-32	Magnesium - Zirconium Alloys, Outstanding Properties of the. By Major C. J. P. Ball, D.S.O., M.C., F.R.Ae.S.	125-128, 211-214	R	
Iron and Steel Industry, Co-operation Essential in the	146	Magnetic Alloy, New.	300	Recruitment in the Ironfounding Industry	2
Iron and Steel Industry Progress in the Urals. By A. N. Speransky	67-68	Manganese Wheels for Cranes	62	Reversing Strip Mill (Cold Reduction), the New 80-in. By John Summers & Sons, Ltd.	37-40
		Mechanical Properties, including Creep, of Aluminium Bronzes at Elevated Temperatures. By E. Voce, Ph.D., M.Sc., F.I.M.	3-9	Rotary Hearth Furnace. By General Electric Co., Ltd.	96
				Royal Commission on Awards to Inventors. By S. T. Madeley	31-32

	Page
Segregation Structure and Porosity, The Relations between, in Chill Cast and in Sand Cast Ingots of 10% Tin Bronze. By W. T. Pell-Walpole, B.Sc., Ph.D., A.I.M., and V. Kondic, B.Sc., Ph.D.	181-187
Service Steels—B.S./STA.5	130-132
Sheet and Tinplate Industries (South Wales), A Plan to Modernise and Develop the	225-226
Soaking Pits, Automatic Control of. By C. H. Stone	18-22
Social Aspects of Engineering. P. H. Kutar	274
Soundness Inspection of Magnesium Sand Castings. By G. B. Partridge, A.I.M.	279-284
South Wales Sheet and Tinplate Industries, A Plan to Modernise and Develop the	225-226
Spectrographic Analysis, Suggested Definitions of Terms used in	240
Spectroscopy (Emission) as Applied to Industry, The History and Present Status of. By John Convey, F.Inst.P.	9-12, 107-110
Steel Drier Rolls, Jacketed Type, By William H. Funk	249-252
Steel, High Creep Strength Austenitic, for Gas Turbines, The Development of. By D. A. Oliver, M.Sc., and G. T. Harris, M.A.	235-238
Steel Making, Recent Developments in. By J. A. Kilby and W. G. Cameron	215-220
Steel-making Furnaces (Open-Hearth), Instrumentation of	278
Steels, Carbon and Alloy, for General Service Applications	130-132
Steels, High and Super High-Speed, A Compound Method for the Absorptometric Analysis of. By F. E. Eborall, A. Met., A.I.M.	104-106
Steel Supplies (British) for 1947	123-124
Strip Mill, the New 80 in. Cold Reduction Reversing. By John Summers & Sons, Ltd.	37-40
Structure Inspection of Magnesium Sand Castings. By G. B. Partridge, A.I.M.	279-284
Surface Hardening of Aluminium and its Alloys. By K. G. Robinson, B.Sc., and B. W. Mott, M.A.	201-204
Swedish Technical Discoveries, Review of.	2
T	
Tanganyika, A Metallurgist in. By J. H. Harris, B.Sc., A.R.S.M.	293
Tin Bronze (10%), Chill-Cast Sand-Cast Ingots of, The Relations between Segregation Structure and Porosity in. By W. T. Pell-Walpole, B.Sc., Ph.D., A.I.M., and V. Kondic, B.Sc., Ph.D.	181-187
Tin Consuming Industries, Progress in the. By John Ireland, M.C., B.Sc.	97-100
Tungsten Carbide Draw Dies. By Richard Saxton	68-69
Tungsten Carbide (Cemented) Production of. By Stuart H. Brierley.	253-254
U	
Uganda, The Work of the Geological Survey of	46
Urals, Iron and Steel Industry Progress in the. By A. N. Speransky	67-68

	Page
Zinc and its Alloys. By B. Walters, M.A.	101-103
Zinc Surfaces, The Phosphatizing of. By E. E. Halls	69-70
Zirconium - Magnesium Alloys	124
Zirconium - Magnesium Alloys, Outstanding Properties of the. By Major C. J. P. Ball, D.S.O., M.C., F.R.Ae.S.	125-129, 211-214

REVIEWS

Controlled Atmospheres for the Heat-treatment of Metals. Ivor Jenkins, M.Sc.	306
Civil Aviation and the Export Trade. Sq./Ldr. Norman J. Freeman	305
Definition and Measurement of Gloss. V. G. W. Harrison, Ph.D.	305-306
High - Silicon Iron Castings. B.S. / S.T.A. 25. British Standards Institution	70
Journal of the Institute of British Foundrymen	156
Journal of the Iron and Steel Institute	232
"Kumium," and "Kutern," I.C.I. Metals Division	70
Laboratory Manual in Metallurgy. John F. Eckel, D.Sc., and Robert J. Rande- baugh, Ph.D.	305
Nickel Bulletin. Mond-Nickel Company	263
Precision Heating for Light Alloys. Templewood Engineering Co., Ltd.	70
Steam Generators. Industrial and Engineering Development Association	206
Technical Data Sheets on Standard Aluminium Casting Alloys. Alar Ltd.	66
World List of Scientific Periodicals	74

CORRESPONDENCE.

Aluminium Finishes. Frank Taylor and S. A. J. Sage	297
Cadmium Plate and Passivated Cadmium-Plate Coatings. E. E. Halls and Frank Taylor	28-31
Cohesive Strength and the Creep of Copper and Monel. D. J. McAdam, Jr. and E. Voce.	234 & 238
Comparison of Electro-Plated Finishes under Humidity Tests. E. E. Halls and Frank Taylor	137-139
Phosphate Treatments. W. F. Coxon and E. E. Halls	233-234
Production of Cemented Tungsten Carbides. S. H. Brierley, E. Ineson, N. W. Read and E. J. Sandford	298-300
Protection of Zinc Surfaces. By Phosphating. Frank Taylor.	36
Surface Hardening of Aluminium and its Alloys. K. G. Robinson, B. W. Mott and Frank Taylor	298

MICROANALYSIS.

Apparatus for Quantitative Inorganic Micro - Analysis, Part II. Volumetric Analysis. By Ronald Belcher and Cecil L. Wilson	47-50
Apparatus in Qualitative Micro-analysis, Part VI. By R. Belcher.	310

	Page
Devices, Miscellaneous Microchemical. By J. T. Stock and M. A. Fill	172
E	
Electrolytic Methods for Microchemical Analysis. By Dr. A. J. Lindsay, Microchemistry Group	267-268
Enclosed Systems, A Micro-Stirrer for Microchemical Devices. Part IX. By J. T. Stock and M. A. Fill	114
F	
Filtering Apparatus. By F. Hudswell	50
Filtering Devices.	172
G	
Gases, Apparatus for the Detection of (Apparatus in Qualitative Microanalysis VI) By R. Belcher	310
Generator, A Micro H ₂ S. By A. G. Lidstone, C. L. Wilson and D. W. Wilson	171-172
H	
H ₂ S. Generator, A Micro. By A. G. Lidstone, C. L. Wilson and D. W. Wilson	171-172
I	
Inorganic (Quantitative) Microanalysis, Apparatus for. Part II. Volumetric Analysis. By Ronald Belcher and Cecil L. Wilson	47-50
L	
Light Alloy Industry, Applications of Metallurgical Microchemistry to the. By Donald F. Phillips	111-113, 169-171
M	
Metallurgical Analysis Applications of the Polarograph to. By G. W. C. Milner.	265-267, 307-309
Metallurgical Microchemistry, Applications of, to the Light Alloy Industry. By Donald F. Phillips	111-113, 169-171
Micro-Analysis, Apparatus for Quantitative Inorganic, Part II. Volumetric Analysis. By Ronald Belcher and Cecil L. Wilson	47-50
Microanalysis (Qualitative) Apparatus in. Part VI. By R. Belcher	310
Microchemical Determination of Molybdenum in Steel. By J. E. Wells, and R. Pemberton	268
Microchemical Devices. By J. T. Stock and M. A. Fill	50, 114, 172
Microchemistry Group Meeting	267-268
Microchemistry (Metallurgical), Applications of, to the Light Alloy Industry. By Donald F. Phillips	111-113, 169-171
Micro H ₂ S. Generator. By A. G. Lidstone, C. L. Wilson and D. W. Wilson	171-172
Micro-separation of Gums and Crystals. B. A. L. Bacharach.	268
Micro-Stirrer for Enclosed Systems, Microchemical Devices. Part IX. By J. T. Stock and M. A. Fill	114
Micro Water Bath	309
O	
Oxidation of Nitrogen during the Micro-combustion of Organic Substances. By A. E. Heron.	267

P	Page
Polarograph (Applications of the) to Metallurgical Analysis. By G. W. C. Milner .. 265-267,	307-309
Polarographic Discussion Panel	268
